

**What is claimed:**

1. A method for forming a film having a peeling property relative to a base,  
5 comprising the steps of: applying oil onto a surface of a base; and bringing the oil applied  
onto the surface of the base into contact with a flame.
2. A method for forming a film according to claim 1, wherein said oil is cooking  
oil.
- 10 3. A method for forming a film according to claim 2, wherein said cooking oil is  
oil and fat containing unsaturated fatty acid.
4. A method for forming a film according to claim 3, wherein said unsaturated  
15 fatty acid is linoleic acid or linolenic acid.
5. A method for forming a film according to claim 1, wherein said film is formed  
in a gelatinized state.
- 20 6. A film formed by bringing oil applied onto a surface of a base into contact  
with a flame, said film having a peeling property relative to the base.
7. A film according to claim 6, wherein said oil is cooking oil.
- 25 8. A film according to claim 7, wherein said cooking oil is oil and fat containing  
unsaturated fatty acid.

9. A film according to claim 8, wherein said unsaturated fatty acid is linoleic acid or linolenic acid.

10. A film according to claim 6, wherein said film is formed in a gelatinized  
5 state.
